- *Custom Forms*
- *Custom Reporting*
- *Batch Printing*
- *Accounting Software Integration*
- *Technical Support*

### webChecks—Easy Checking Anywhere!

webChecks is the latest development in **complete checking account management**. It combines the management and reporting capabilities of a QuickBooks, Peachtree, or other accounting software program with the ease of use and ready access of your bank's internet banking program. Most accounting software is very feature rich, but is only available when you are at your home or office. Your bank offers a simple web based tool to view your balance and print basic histories. Some offer the ability to pay bills online. But, from your bank's software you cannot print checks, reconcile your account, or manage your accounts payables.

webChecks is the best of both worlds! It is the power of an accounting system with the ease of use and availability of an internet banking system. You can print checks, post deposits, withdrawals or transfers to your account. You can enter invoices, pay bills, and manage vendors. You can print checks, account activity, or other management reports. The application will allow you to control your checking account completely from your home, office, or while traveling on the road.

Easy and flexible security also allows you to delegate check writing ability to members of your organization. webChecks can be used to print checks at any of your chapels. Staff with permissions can produce high quality laser checks while you have complete oversight of the account balance and activity. No more hand written checks or blank check stock that is hard to account for. This feature is great for multi-chapel offices.

webChecks puts you in complete control of your cash and allows you the freedom to manage from anywhere.

## webChecks

### Check and Invoice Entry

webChecks provides one simple screen for check and invoice entry. It was designed by funeral directors, managers, and owners for use specifically in funeral homes. Although you can enter detailed Invoice, Due Date, and Purchase Order information, you can also choose to enter only the most necessary data. To Print a check, all that is required is a check number, date, vendor, description, and amount. The system even provides the check number and date automatically. You have the ability to pay multiple items or invoices with one check and allocate expense to one or more places as well.

### Check Printing

webChecks' printing feature allows you to print laser checks on your local printer. All that is required is pre-printed check stock from your bank. We can work with any stock that is 8 1/2" x 11". You can print a single check or a group of checks simultaneously. If you choose a group of checks, the system will automatically number and date the checks for you. You can preview the checks prior to printing them to ensure accuracy. Signatures can also be automatically printed onto the check.

### Checking Account Management

Your checking account is more than just checks, though. webChecks also provides the entry of non-check transactions. Such items include withdrawals, transfers, deposits, ACH debits, wire transfers, interest earned, and fees. All of these can be recorded to provide you with as accurate a balance as possible. webChecks will be able to provide you with a running balance using the Account Activity Report. You can also download transactions from your bank for loading into webChecks. If your bank supports Quicken/QuickBooks format, you will not have to manually enter these to get your account balance accurate. With these features, reconciling your checking account each month becomes a breeze!

### Accounting Interfaces

webChecks can export data to Peachtree, Quickbooks, or Lawson accounting systems. As a result, you can quickly post your transactions to your general ledger with little or no effort. webChecks also integrates with Federated Funeral Directors of America, so if you are a member you can automatically transmit your general ledger data to them. The less time spent on accounting, the more time you can spend with your families.

### Custom Reporting and Customization

Like all Ionic services, webChecks is more than just a software program. It is a complete service designed to make your work easier. In this regard we will create any custom reports or modifications to existing reports that you need to make webChecks work for you. We also provide free training and 24x7 support so that you and your staff will always be able to get the answers you need when you need them!
